# ABS SMART KIT

## The ABS Smart Kit

A car's suspension is a key part of its active safety system. When any of the parts is worn out and gets replaced, the other parts will wear out more quickly. Some types of car are quite sensitive to this. For these types, it is sensible to replace the entire suspension at once in order to guarantee maximum safety.

To make this more appealing to you and your customer, ABS is offering the ABS Smart Kit. The ABS Smart Kit always contains a combination of products of both sides at an attractive price! Another big advantage, the application only needs to be aligned one time instead of several. Thus it is cost saving in comparison with separate product replacement and separate alignment of the application.
